

Operations and Digital Transformation Leader

MedTech-adjacent operations | AI-enabled work systems | Customer-backward execution | Process-product adoption

Operator-technologist who makes complex work visible, connects technical and business teams, and builds operating mechanisms that turn emerging technology into adopted, measurable outcomes.

ROLE-ALIGNED CAPABILITIES

Digital operating models

Translate recurring friction into governed workflows, decision mechanisms, standards, and adoption routines.

Customer-to-cash adjacency

Customer service, CRM, fulfillment, logistics, ERP/Odoo, issue flow, handoffs, and operating visibility.

High-reliability execution

Quality systems, process controls, root cause, escalation, evidence, and technical program delivery.

EXPERIENCE

Vape-Jet - Director of Operations

2025-Present

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

Amazon - Operations Management / Site Leader

2014-2018

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms.
- Applied Lean and Gemba practices across safety, quality, throughput, customer experience, and team engagement.

Compunetics - Director of Operations and Engineering Management

2000-2013

- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls.
- Collaborated with high-consequence customers and partners including DoD, CERN, Intel, and AMD.

DudeWorth - Founder / AI and Automation Advisor

2017-Present

- Develops AI-readiness and opportunity frameworks spanning value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns with structured context, human judgment, escalation, evaluation, and governance rails.

COMPLEMENTARY LEADERSHIP DEPTH

Cardinal Building Products - Regional Director

2021-2023

- Built the company's first remote regional operation.
- Modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

ZeusVu - Chief Pilot, Autonomous Systems and Aerial Data Operations

2018-2022

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.
- Designed medical drone delivery and chain-of-custody concepts connecting technology, risk, stakeholders, and governed execution.

LEADERSHIP AND CIVIC TECHNOLOGY

Enviro Social Capital - Chairman of the Board, 2014-2017. Co-founded and led a public-private impact initiative focused on sustainable infrastructure, green finance, and civic transformation; helped shape and evaluate a \$200 million Social Impact Bond feasibility concept.

IEEE - CMPT and EDS Pittsburgh Chapter Chair, 2012-2016.

Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology.

EDUCATION AND CREDENTIALS

University of Pittsburgh - Bachelor of Science. Academic grounding includes materials science, physical chemistry, and biology-related studies.

Credentials: IBM Enterprise Design Thinking Practitioner; Six Sigma Certification; OSHA 10.

TECHNICAL TOOLKIT

Agentic AI; LLM workflows; RAG patterns; human-in-the-loop design; Python; SQL; JavaScript; TensorFlow; Tableau; ERP/Odoo workflows; Jira; Confluence; HubSpot; Slack; GIS and mapping workflows.

SELECTED OPERATING MECHANISMS

Visibility and cadence

Dashboards, throughput visibility, operating routines, standard work, escalation paths, and accountability.

Quality and evidence

Root cause, process controls, chain of custody, regulated execution, performance measures, and 100% drone safety record.

Customer and flow

Customer service, CRM, fulfillment, logistics, route planning, online buying, and distributed operations.

AI and adoption

Readiness, value, feasibility, data, governance, human judgment, training, reuse, and time-to-value.

Candidate thesis: A Digital Factory should convert recurring OTC friction into governed process products - making customer commitments explainable, exceptions visible, and improvements reusable.
